The open plan living space retains the natural materials and clean lines, the designers choice was in favor of a more striking theme with clean accents. This 3732 sqft townhome is not your typical rooftop Denver duplex. Over 2500 sqft above grade you will not be disappointed with the open bright layout. An office on the main floor, upstairs, boasts dual master suites that each have an abundance of closet space and their own private decks. The gourmet kitchen with Carrara Marble countertops is the focal point of the home. The family room is built for entertaining, with 9' of folding windows that opens up to the backyard to create an indoor/outdoor entertaining environment. The fully finished basement hosts an additional bedroom, bathroom and another great living room for entertaining. This stunning townhouse has the feel of the modern townhouse with the amenities of cus...
