The last of three beautiful single family homes in the perfect Denver location. Located on a beautiful block in a central location just a short walk to City Park, Cap Hill, Downtown, Uptown you get the best of both worlds, walkable to so much but on a quiet lovely street. Each of the three homes has a custom design (no cookie cutter homes here). This open floor plan home features the best in design with large windows for natural light, 10 ft ceilings on the main level, wide open staircase, full finished basement and the most rare find in the area a massive true 3 car garage. The main floor has the perfect work from home office space for telecommuting. The great room style floor plan is open and flowing with a large kitchen and island bar area, perfect for hosting friends. The indoor/outdoor living space is perfect with large door that slides to open to the perfect size yard to relax and enjoy famous Colorado evenings. You will be impressed top to bottom with this home. Last one and ...
